RECOMMENDATION

For "AVIS – ENGINEERING" Ltd Plovdiv with head office Plovdiv, 15 K. Gerov Str., registered on company case № 489/1996 and decision № 802/26.01.1996 of PRC.

During the construction works for the project "Electrification and reconstruction of railway line Dupnitsa – Kulata" financed by the PHARE CBC Bulgaria – Greece, the company "AVIS" Ltd Plovdiv was approved by the Resident Engineer DE-Consult Germany for a Subcontractor of the assembling work of the catenary.

The company is specialized in catenary implementation.

It has in possession specialized equipment ADM and DM (assembling) machines for execution of assembling works.

It is equipped with a specialized small-scale mechanization (equipment) for this kind of activity.

The technical management and the production staff is well prepared and has the necessary production experience.

All the time during the construction, the technique took part in the assembling works.

Besides, with its own efforts, resources and mechanization the company implemented the catenary at Sandanski, Kulata General Todorov stations and some open routes.

During the work the company showed high level of qualification in observance of the approved designs, standards and regulations, accuracy and speed.

All the deadlines in the work were observed.

The completed work was accepted by the Resident Engineers without remarks.

The present recommendation is given to serve for participation of the company "AVIS" Ltd in construction auctions.
